The Liberals' Big Pow-wow

Mr George J. Bryan was in attendance on Saturday last, at the meeting of Liberal stalwarts in the Palliser hotel, Calgary, when the big Liberal Provincial-Federal Economic Conference opened. Addresses were made by Mr R W Howson, the Liberal leader, and G G McGeer of Vancouver.

Wedding Anniversary.

Mr and Mrs L M Larson were "at home" to a number of their friends, at their residence, Friday evening, the occasion being the anniversary of their wedding day. Games and music helped pass a very pleasant evening. The worthy couple were the recipients of mementoes of the occasion; and, on leaving, each guest wished them continued health and prosperity.

Muldoons the Musicians.

Muldoons the Musicians played for "The Dance of the Season" at Kelly's Hall on Friday night. The orchestra numbered five pieces, and their product was greatly appreciated by those present who tripped the light fantastic. The crowd present, owing to other nearby attractions that evening, was not so large as the occasion warranted.

Concert on the 22nd.

Students from Concordia College are to invade Stony Plain on the evening of the 22d and give another of their popular concerts. The program to be offered promises to be a good one, and one acceptable to an audience here. The College boys have always met with a good reception on their visits here, and no doubt this occasion will be no exception.

The Seed Fair.

Down at Holborn today, the 6th, the Seed Club is putting on their Annual Seed Fair, starting at 10 a.m. and continuing to 4 p.m. Mr Knox McKinnon is president of the club. Representatives of the Seed Branch, Dept. of Agriculture, will be present; and Mr Longman, Field Crops Commissioner; and Dr Wyatt, of the U. of A. There is to be a banquet early in the evening, by invitation; and at 8 p.m. the hall will be thrown open to all who wish to listen to the speeches.

Fodder for the U.S.A.

It would be a big mistake for those who have on hand fodder of any description to overlook the advt. inserted in another column of The Sun by Sheriff M McGregor of Brandon. He has been appointed purchasing agent in Canada for the Federal Emergency Relief Administration of the U. S. and announces that he is prepared to purchase straw, hay or other fodder for export to that country until the beginning of next June. If samples are forwarded to him, prices will be furnished by return mail. Hay presses, hammer mills and cutting boxes can be placed for a full winter's work. Sheriff McGregor has traveled extensively in the neighboring country of late and states that when we talk about our drought areas we have no idea of the meaning of the term.

"It is a pity," he writes, "to see animals starving on one side and fiddlers being wasted or burned on the other side of an imaginary line."

Confidence Is Returning

The year of 1934 is rapidly drawing to a close and people are already turning their thoughts to the coming new year and giving consideration to matters which will command their attention and activities in the next twelve-month period. Already throughout the western provinces municipal councils and school boards have been chosen to which will be entrusted the administration of local community business throughout the new year. And the thoughts of all people are increasingly occupied with what betterment of existing conditions may be looked for in the months that lie ahead.

Unquestionably, people are entertaining a greater degree of confidence that the general economic situation is improving than has been in evidence for some time—the most discouraging feature being the continued political unrest in Europe and the effect which any outbreak there would inevitably have upon the whole world. However, confidence grows that here at this western continent the worst of the great depression is over and we are at last and definitely on the up-grade.

Restoration of confidence is one of the essential requirements to carry the world along the road to betterment, because until that confidence is restored everyone is afraid to venture in any direction, all continuing to live from hand to mouth, thinking only of the necessities of the immediate present instead of in terms of a larger and better future. While an undue and unjustified optimism at this time would be just as fatal in the long run as a continuance of an unjustified pessimism, it is perhaps well that attention should be directed to facts, figures and conditions which provide a sound basis for hopefulness and a greater confidence.

In recent years of financial difficulty and economic depression, many people have come to look with suspicion upon bankers and banking, but the fact remains that our Canadian banking institutions are about the best informed of all organizations as to the exact state of affairs in the Dominion. They have to be. Furthermore, they are always conservative in their sizing up of the general financial, economic and business situation. Banks, as a rule, are not overly enthusiastic or optimistic.

Because the above is true, there is real encouragement to be found in the monthly business summaries and news letters recently issued by the banks of Canada. One of the latest to come to hand is that of the Bank of Montreal, Canada's most conservative banking institution, dated November 23. For the benefit of readers who may not have the opportunity of reading these monthly business summaries, a few facts from this most recent publication may well be quoted.

Reviewing the Canadian situation, the Bank of Montreal says: "Trade has continued its upward trend during the past month and the winter season opens with conditions generally distinctly better than they were a year ago. A review of the first ten months of the present year shows that of some fifty business indices available forty-five show gains, the majority of a pronounced character. The Dominion Bureau of Statistics Index of the physical volume of business, which well sums up the whole, has advanced 21.4 per cent."

It is pointed out, too, that industrial activity is more apparent in a wide variety of trades than at this period in 1933, and that a wider distribution of goods is being made. Both import and export trade is increasing, bank clearings, railway car loadings, mineral production, forests and fisheries all reveal substantial betterments, while even in agriculture, and taking the Dominion as a whole, crops have been more abundant than at one time seemed probable and prices are higher.

Railway car loadings are greater than for several years and at the end of August were 24% higher than in the preceding year; employment in October, which usually shows a downward tendency, actually increased, the official index reaching 100 (which was the index in 1926) compared with 90.4 and 86.7 in October 1933 and 1932 respectively. Commercial failures were fewer in 1934 than in any of the preceding three years.

Dominion Government revenues reflect this general improvement, with Customs duties collected in the first ten months of this year 25% greater than in the same ten months of 1933.

Referring to the situation in the United States, the bank summary says: "The past month recorded a partial return to the business activity that had characterized the earlier months of the year."

Steady improvement in Great Britain is recorded. For the ten-month period total trade increased by \$32,000,000 over the corresponding period last year; railway traffic increased 4.1% since January 1; the number of persons in employment shows further improvement; British Government securities have reached the highest prices on record for nearly thirty years.

Thus the situation in Canada, United States and Great Britain, in which countries Canada is most vitally interested, is found to be of an encouraging character, making for a greater degree of confidence in the future, which, let it be repeated, is an essential condition to continued and greater improvement.

Oldest Farm Workers

The combined ages of the three men who won the prizes offered by Williton and Dunster Agricultural Association, England, for the oldest farm workers still in active employment totalled 261 years. First prize went to John Chilcott (85 years), second to John Reed (84), and third to Thomas Gould (83).

If you want to make money, just propagate a dwarf lawn grass which will grow only two inches high and still stay green.

Scout Had Wonderful Trip

Spent Summer in Northern Seas On Steamship Nascope

Thirteen thousand miles had been covered by Cockburn McCallum, Winnipeg King's scout, when he arrived, in Winnipeg after having travelled with the steamship Nascope on its annual trip through northern waters to the Arctic posts of the Hudson's Bay Company and the Royal Canadian Mounted Police.

It was an adventurous and wonderful journey which has come the way of few youths, and the Winnipeg scout, who received it from the Hudson's Bay Company as the award given annually to Canada's outstanding scout, realized that when he arrived at the C.N.R. station and was greeted by his mother, Mrs. A. H. McCallum, his friends and officials of the Manitoba council of the boy scout association.

He left Winnipeg on June 29, going first by train to Toronto and Ottawa and then to Montreal, from where the Nascope sailed July 7. In Ottawa he received the flag of the Boy Scout Association, which flew at the top of one of the steamer's masts during the whole journey.

As the steamer sailed northward he saw the barren, rocky coast of Labrador, Cartwright, Burwell, Lake Harbor, of Baffin Land, Wakeham Bay, Wolstenholme, Cape Smith, Fort Harrison and Charlton Island were posts on the northern coast where the steamer called as she proceeded to Hudson Bay and James Bay.

His company on the ship was as interesting as the journey itself. There was Ashley Cooper, governor of the company, and his party, Dominion government scientists, R.C.M.P. officers on their way to duty at northern outposts, and men who would work at Hudson's Bay Company trading posts.

Several times the steamer was locked in ice floes and fogs, on one occasion for seven days, and three days at another time.

The most northerly point reached by the ship was Craig Harbor, on Ellesmere Island, where R.C.M.P. officers are stationed. En route to the island the ship stopped at North Devon Island to establish a new H.B.C. post at Dundas Harbor. Two company men were left at the new post with several Eskimo families and their dogs, taken up from Churchill.

The return was started from Ellesmere Island about the middle of September, after several snows, which would render the trip impossible had it not been for the Eskimo guides.

The Nascope arrived at Halifax on the evening of Sept. 30, and Cockburn visited several eastern cities before continuing west.

The long trip is now over, and his second year in the Arctic of the University of Manitoba has begun. He is a member of the 44th Winnipeg troop, St. Margaret's church.

The Hero Of Trafalgar

Nelson Was Considered Weak Youth When He Started Career

The exhibition of old pictures illustrating Vice-Admiral Viscount Horatio Nelson's career, recently held at the Parker Gallery, is full of interest. When Nelson joined the ship of his uncle, Maurice Buckling, the latter asked his father what the lad had done, that one so weak should be sent to rough it at sea.

That was in 1770. Twenty-seven years later, at Santa Cruz, the "weak youth" swarmed up a rope on board his ship, the *Theseus*, calling for the surgeon to amputate his shattered right arm. Sixty hours later, after an operation minus any kind of an anesthetic, Nelson was writing a despatch to Lord St. Vincent with his left hand. He assured the Duke of Clarence "that a scrap of that order with which I served our King has been shot away."

Off Cape Trafalgar, on the historic eve of our most glorious naval action, he said, "I'll now amuse the day with a signal," and gave his captains the immortal "England expects" epic. A few hours later came the tragic: "They have got me at last, Hardy!"—London Letter.

The ancient Russians buried their unfaithful wife to the waist in damp earth.

YOUR HANDWRITING REVEALS YOUR CHARACTER

By LAWRENCE HIBBERT
(Grapho-Analyst)
(All Rights Reserved)

(Editor's Note: It is very evident that interest in these articles, and in the subject of Character Reading from Handwriting, is increasing. Many readers are sending in their own handwriting for a personal reading by this well-known handwriting expert. Have you sent yours? See the author's invitation following this article.)

In the course of a huge mail that comes in to me every week, I am impressed by the number of young people, of both sexes, who are very vitally interested in finding what their friend's character is really like. Some of them are franker than others and inform me that they will rely entirely on my verdict. I am gratified by this confidence and always endeavor to guide my correspondents aright.

I often hesitate to inform any person that their handwriting is totally unsuited to them, because, so often, people can rectify weaknesses or negative traits—by a little self-tuition. The first point is that a lot of people are unsuited to others, unless they get down to brass tacks and improve themselves. A young lady wrote to me recently, and sent me a specimen of her boyfriend's writing. Incidentally, she told me that he was very fond of gambling, and did not seem able to give it up. A cursory inspection of his writing revealed that his worst fault was his inability to say "no". It does not take much thought to realize that this young man is guided too much by others, and, in his particular case, he finds it impossible to refuse whatever his chum suggests, some form of gambling. He hasn't the backbone to say "no".

There is a chance for him, and for my correspondent's hope of making a successful union with him—but it depends on himself. He must exert some backbone. He must learn to decide things; to make up his mind. If he doesn't, or will log, then my young lady friend may as well write him off as a bad loss, and turn her attentions in another direction. One of the worst failings to which anyone can be subject, is a chronic indecision and procrastination. Anyone who has this disability—for it is a mental ailment—is an unlucky person to become fond of. Unless the failing is overcome, trouble and unhappiness are almost certain to follow.

There are cases where I have no hesitation in warning people to have nothing to do with certain others. One who has this disability stands out in their writing like flag-poles. I will deal with this subject further in a later article.

"Mabel," Saskatoon—The writing of your friend shows that she is a pretty and cheerful person. You will be quite safe to entrust her with the matter you speak of, because you can be sure that she will look after it. It is her nature to do so. And, being honest and straightforward as she is, you can depend upon her.

Would you like to know what your handwriting discloses? Have you any friends or acquaintances whose true character you would much like to know? A character reading will amuse you with its insight, and may open the doors of opportunity to you. Send specimens of the writing you

want analysed, and state birthdate in each case. Enclose 10c coin for each specimen, and send with 3c stamped addressed envelope, to: Lawrence Hibbert, care of Winnipeg Newspaper Union, 175 McDermott Avenue, Winnipeg, Man. Letters will be answered as soon as possible, but please allow at least two weeks for your reply. All letter are confidential.

Aid Found Successful

Removal Of Thyroid Gland Helps

Sufferers From Heart Disease. Surgical relief of "heart disease," suggested by United States medical authorities, has been found successful in England.

Drs. O. Brenner and Hugh Donovan of Queens hospital, Birmingham, treated six sufferers of congestive heart-failure and angina pectoris by surgical removal of the thyroid gland in the neck, known as the "pace-maker of the body," because it is this gland which governs the speed at which the body processes work.

It has been known for years that in certain diseases of the thyroid gland the heart races, the lungs work more rapidly and other body functions are accelerated. American medical authorities suggested that if the "pace-making thyroid" were removed, the body processes would adjust themselves to the pace of the weakest part of the body-machine, the flagging heart. This theory was followed by Drs. Brenner and Donovan and the results have so far been successful, they stated.

The six patients treated by the new surgical method now are capable of more exertion than has been possible previously, the doctors report.

Make Valuable Discovery

Carthage, Buried For Centuries, Has Been Brought To Light

A whole section of the ancient city of Carthage, buried for centuries beneath the sands of Northern Africa, has been brought to light, archaeological workers announced.

The excavations have revealed villas, paved streets, houses and buildings almost intact from the second and third centuries, and the discoveries are regarded by scholars as of great archaeological importance.

A part of the ancient city, hitherto unknown, which overlooked the Gulf of Tunis, has been uncovered, giving a vivid picture of daily life as it was long centuries ago.

The excavations are being continued, and a careful guard is being kept to prevent looting and vandalism.

The largest known pearl in the world measures four and one-half inches in circumference.

FALSE TEETH

Dr. WERNET'S POWDER

Dr. Wernet's Powder holds false teeth so firmly and comfortably in place and 24 hours they actually feel natural—eat, laugh, sing without fear of any slipping. Prescribed by world's greatest dental states—they know it's the best—just sprinkle on. Inexpensive—say druggists.

Speaker Says Canada Lags Far Behind Other Dominions In Caring For The Blind

The blind man's heritage—sightless eyes—and it is through those eyes that he sees the world, the earth, Vague understandings of the stars, the moon, flowers and trees have made them a miracle to him. He goes through life using only four senses, his imagination must replace for him the sense of sight. Yet, with this affliction the blind occupy a position in Canada that is several inches below that of the criminal.

This was the startling contrast made by Philip E. Layton in his address at the 26th annual meeting of the Montreal Association for the Blind, of which he is the president and founder.

In comparing the work that other countries in the British Empire and the world are doing for their blind, Mr. Layton said, "Canada boasts that it is the leading Dominion in the empire. I am sorry to say that it is far from the leading Dominion in the care of its blind. Canada takes far better care of its criminals than it does of the poor blind. The criminal is given board and lodging and clothing but the blind are left to starve or beg. The way of the blind is particularly hard. Prejudice and ignorance stare them in the face at every turn. When they have received degrees at universities or diplomas for teaching music or tuning pianos, they find it very difficult to get a position. It is bad enough to be deprived of seeing the wonderful world, but the economic condition of the blind makes it much worse," he said.

"The depression has cut great inroads into the earning power of the blind," the speaker continued, "also their friends have not been able to help them as they have done in the past. A few years ago hundreds of blind people got their living teaching music, playing at parties, or tuning pianos, but the radio has taken these occupations largely away.

Mr. Layton spoke of the work that is being carried on towards having the old age pension apply to the blind by Dr. Cotnam, M.P., for Renfrew, Ont., who will present that bill at the next session of parliament. He suggested that a letter from the blind association would greatly encourage the member of parliament.

Continuing Mr. Layton said: "In listening to the reports tonight of the work of this organization I thought how fortunate blind people were who had employment in shops. There are only 250 blind people employed in six or seven workshops for the blind in Canada. Probably another 200 are earning their living selling newspapers or operating canten stands, etc. There are probably from eight to ten thousand blind people in Canada and not more than five per cent. of this number are able to earn their own living. There are at least 1,000 blind in Montreal.

"When a man loses his eyesight he loses his job and often his home. His children are sometimes separated from him. He makes every effort to surmount his affliction but at last like a bird with a broken wing he gives up. His spirit is broken, he loses his health physically and mentally and then insanity sets in, followed by suicide.

"People often ask: 'Where are so many blind people?' We don't see them on the streets. We don't see them about. There are many good reasons for this. They are kept shut in homes. They have no clothes to go out with. Their sisters and brothers and friends would be ashamed to be seen with them on the streets. Some of the blind have never known what it is to have a new suit of clothes or a new dress. Again, the blind are afraid now to go on our streets, with few exceptions. Afraid they might be knocked down by a motor car. Quite a number of blind people have been killed or injured on our roads. Three or four blind people belonging to the Montreal Association for the Blind have been killed—Montreal Star.

The man in the moon is seen up-side down in the southern hemisphere.

Habits Of Certain Ants

Naturalists Find They Often Wait On Each Other

Naturalists who have been studying the habits of certain ants have discovered that the insects go through most careful operations of cleaning themselves. Each ant performs this operation, not for herself, but for another. She acts for the time as lady's maid. She stands by on her side, even on her back, a perfect picture of ease. The pleasure the little insect shows in being thus combed and washed is really an object lesson to many higher animals.

By Ellen Worth

PARIS IS DOING DARLING THINGS WITH SILKS THAT EXPRESS A NEW ELEGANCE IN MODE

The right color can be very flattering, and there is a wide choice of colors this season. Again, there is the always popular black crepe dress brightened by a touch of white, color or metal shot fabric.

Black pebbly crepe which is very chic made the original. Its voguish bib collar was white crepe with gleaming metal threads.

It's an exceptionally simple dress to make and think of the saving in cost.

It's attractive also carried out in wool crepe in bottle green with toning velvet trim, ruby-red canton crepe with white bengaline or all in one scheme as brown woolen with gleaming criss-cross threads in gold.

Style No. 540 is designed for sizes 16, 18 years, 36, 38, 40 and 42 inches bust. Size 38 requires 4½ yards of 36-inch material with ½ yard of 28-inch contrasting.

Price of pattern 20 cents in stamps or coin, (coin is preferred). Wrap coat carefully.

Supplementary Fuels In Farming Feasibility Of Using Blended Fuels In Low Temperatures

In view of the growing practice of using supplementary motor fuels in admixture with gasoline for farm and other machinery, the feasibility of using blended fuels in countries like Canada, in which low temperatures are encountered in winter, has been studied at the National Research Laboratories in Ottawa. This particular form of research is of special practical importance to the Dominion, and consequently the laboratories have determined the relation between water content and solution temperature of the various gasoline mixtures now in use or being tried out.

Owing to their availability, benzol and ethanol (ethyl alcohol) are in extensive use in the preparation of mixed motor fuels in which gasoline is the main constituent. Recent developments make it appear that isopropanol (isopropyl alcohol) can be manufactured cheaply from waste gases which are by-products of the petroleum industry, and it is not unlikely, says the Canadian Journal of Research, that in the near future this substance may become commercially available as a fuel.

A problem arises in connection with the use of mixed fuels containing ethanol, namely, the possibility of separation into two liquid phases upon the addition of relatively small amounts of water. At a given temperature any alcohol-gasoline mixture has what is known as a critical water content, and, conversely, such mixture containing dissolved water has a critical solution or "cloud" temperature below which separation into two phases will occur.

Not Good For Hogs

Mature Soy Bean Seed Lower Quality Of Pork

The mature soy bean seed, either whole or ground, provides an excellent protein feed to use with oats and barley for all kinds of livestock, except market hogs. Soy beans contain a large amount of oil and when fed to hogs in even small quantities the quality of pork is lowered. It is, therefore, recommended that farmers refrain from using the soy bean for feedings to growing hogs. Brood sows can be wintered nicely and will produce healthy litters when fed on a ration containing a proportion of soy beans. As a source of protein for dairy cattle and to keep the cows in excellent condition the soy bean is excellent when fed in conjunction with other grains.

Approximately 30 varieties of soybeans are grown on farms in this country. It is estimated that there are more than 2,000 varieties of this bean, a native of China, in the world.

Control Of Arms Traffic Only Means Of Averting Malpractices, Says Hon. Stanley Baldwin

A New Map

Department Of National Defence Issues Map Showing Airports

A new map of Canada showing the airports, intermediate aerodromes, seaplane ports and anchorages, has just been issued by the Department of National Defence, in co-operation with the Department of the Interior as an aid to aviators and all interested in flying activities. The various types of landing stations are designated by separate symbols; thus there are shown forty-eight public airports, twelve private airports, thirty-one intermediate aerodromes, eighteen public seaplane ports, nine private seaplane ports, twenty seaplane anchorages, three Royal Canadian Air Force landplane stations and five seaplane stations. These are mostly confined to southern Canada, but there are others such as Fort Smith, Cameron Bay and Akivik in the Northwest Territories. Akivik, which is the farthest north airport, is situated immediately to the west of the delta of the Mackenzie River. Most of the prominent mining fields are equipped for aeroplane transportation and stations are shown at Rouyn, Red Lake, Flin Flon, and Cameron Bay on Great Bear Lake.

The list of airports and intermediate aerodromes from Winnipeg to Lethbridge and thence north to Edmonton. A similar chain is being constructed at the present time between Quebec and Winnipeg, but as they are not yet completed their locations are not shown on the present map.

The map is distributed to aviation officials and flying clubs by the Department of National Defence, but the general distribution to the public is made through the Topographical and Air Survey Bureau, Department of the Interior, Ottawa, at ten cents per copy.

Do Away With Slums

Prince Of Wales Makes Plea For Mass Production Of Houses

A strong plea for mass production of houses and complete sweeping away of the slums was uttered by the Prince of Wales, speaking at the centenary dinner of the Royal Institute of British Architects.

Two thousand assembled architects and their wives heard the prince, who has made this problem one of his special cares in late years, making many visits to slum districts throughout the country. The government is now engaged on extension of its rehousing program.

CROWN PRINCE VISITS LONDON

When the United Services Ball was held in London recently in aid of the ex-Services Welfare Society, many foreign celebrities attended. Here we see the Crown Prince of Spain dancing with Lady Dalrymple-Champagne. The Ball was held in Grosvenor House, and, incidentally, when the toast was drunk to the King's health, it was the first time this had been done in this famous old mansion since the eve of the Battle of Waterloo.

The need for every great nation joining the League of Nations and strengthening it as an agency for international peace was emphasized in a speech at Glasgow by Stanley Baldwin, lord president of the council in the British cabinet.

He also told an audience of 4,000 persons that state control of the arms traffic was the only means of averting malpractices.

A collective peace system such as advocated by the Labor party—employment of joint force under direction of the league—"is impracticable in view of the fact the United States is not, to our unbounded regret, a member of the league," he said, "and also in view of the defections of Germany and Japan from the league in the last two years."

"So long as I have responsibility in any government for deciding whether to join a collective peace system and as an individual never will I sanction the British navy being used for the armed blockade of any country in the world, until I know what the United States will do."

"We will never get a League of Nations with the power and influence it ought to have," he continued, "until the United States is a member. And the league cannot function as it should with Germany and Japan outside. Whether the United States will ever abandon her traditional policy I cannot tell."

"What we must do is go on working largely by faith to get back those who belonged and trust the day will come when the world circle will be complete by the admission of the United States."

Dealing with private manufacture of armaments Mr. Baldwin expressed sympathy with the people who had read of the allegations in the Washington munitions enquiry, and had been horrified by some of these allegations and revelations. "The only method of dealing with these malpractices of which we have allegations and in some cases proof, lies in control," he added.

Studying New Sun Spots

Effect On Earth Not Fully Understood By Scientists

Astronomers all over the world are observing with intense interest the appearance of new sun-spots, regarded as the forerunners of the next cycle, which for the next 11 years or so may affect weather, increase magnetic disturbances, occasionally interrupt telegraph and telephone services, and bring more ultra-violet light for sun-bathers, and possibly poorer reception for radio listeners. Popular belief that sun-spots with epidemics, business cycles, severe weather fluctuations and such phenomena as the number of rabbits and visitations of locusts. No scientific evidence to support such ideas, however, has been found. Scientists do not yet fully understand the specific effects sun-spots have on the earth and its inhabitants. Last August, astronomers found that the number of sun-spots was lowest since 1923, and the few that they did see then were the lingering remnants of the sun-spot cycle which ended last summer.

Still Using Wooden Ploughs

Found Most Efficient In England On

Wooden ploughs are not only still common in England but efficient for their task. On some clay-lands they are preferred to iron. They are most common in East Angles. At Maldon, Essex, there is a firm that has been making wooden ploughs for 120 years. To this day they exhibit and sell them at shows such as the "Royal," where they take their place among the most up-to-date electrical and petrol appliances.

Western Sheep Ranges

Canadian western sheep range produce from 150,000 to 200,000 lambs each year suitable for fattening purposes. In addition, there are at least 150,000 to 160,000 unimproved farm lands that would benefit by being fattened.

WORLD HAPPENINGS
BRIEFLY TOLD

A multitude of 200,000 persons watched the Duke of Gloucester unveil the Anzac Memorial in honor of New South Wales soldiers who fell in the war.

Cash income of United States farmers during October from all sources was reported by the bureau of agricultural economics to have totaled \$736,000,000, compared with \$620,000,000 in October, 1933.

D. Leo Doland, director of the Canadian travel bureau, is on a tour of western cities to get viewpoints on advertising Canadian attractions for tourists. Economic difficulties were not interfering with tourist traffic, he said.

Prime Minister J. Ramsay MacDonald announced in the House of Commons that Great Britain will not propose to the United States negotiations for a pact of mutual assistance in the Pacific along the lines of the Locarno treaty.

The judicial committee of the privy council reserved judgment on the appeal of the province of Manitoba from a decision of the Canadian supreme court, in a dispute with the Dominion government over timber dues.

The Earl of Bessborough, Canada's governor-general, already known as an accomplished actor, revealed himself as a horticulturist of note, winning the gold medal for the best variety of chrysanthemum shown at the Royal Winter Fair, Toronto.

A wedding gift from the navies of the empire to the Duke of Kent and Princess Marina was exhibited at the admiralty in London. It consists of a rare antique silver tea-service fitted into an oak chest on which is inscribed the names of the Royal navy and of the Dominion and Indian navies.

Russian Crown Exhibited

Was Sold By Soviet Government To Private Collector

A crown worn at their marriage by the last three Russian czars was exhibited at the fine arts exposition at Rockefeller centre, in New York. The crown, which is a part of Czars private collection, is the most important piece of Russian crown jewelry known to have been disposed of by the Soviet government since its accession to power.

It is made of scarlet velvet ribbons, stiffened and shaped into a circlet with three cross pieces. On the ribbons are two rows of large diamonds and three of smaller stones, and a cross which tops the crown contains five huge brilliants. There are 320 of the big stones in all and 1,200 of the small, and the total weight of diamonds on the crown is about 260 carats.

The crown was made about 1840, during the reign of Nicholas I, for the marriage of the future Czarina Maria Alexandrovna to the Czar-alexander, later Czar Alexander II. The other czars who wore it were Marie Feodorovna, wife of Alexander III, and the ill-fated Alexandra Feodorovna, wife of Nicholas II, the last autocrat of Russia.

Chances are Catherine the Great wore the diamonds in their present settings, and that they were later simply sewn on to the crown shape. The diamonds are extraordinarily clear and brilliant stones, of South American or Indian origin.

Great Display Of Apples

Detroit Fruit Company Paid Over Thousand Dollars For Shipment

"The world's largest box of apples," a specially built mammoth replica of a standard apple box, was displayed by the Wahash railway on its Canal street train track in Chicago.

The box mounted on a 40 foot flat car, contained 756 bushels of grade 100 "extra fancy" wasshapples from Yakima, Wash., weighing a total of 34,262 pounds, and consigned to the Detroit Fruit Auction Company of Detroit. The company is said to have paid \$1,001 for the shipment. On either end was a huge replica of a shipping tag carrying names of contributing apple growers.

Bird That Rivals Parrot

Budgerigar Can Speak Long Sentences And Are Not Bored

The parrot's reputation for being the best talking bird is in danger. He has a very serious rival in that little pastel-tinted fellow, the budgerigar. In the recent bird show at the Crystal Palace, London, there were recently budgerigars that could talk the average parrot's head off. They recite poems and nursery rhymes. They have imagination as well as eagerness and they are not rude, like parrots. It is even claimed for some of them that they speak long sentences in the best English. "Billy Martin," shown by Mrs. S. A. Martin, of Catford, has a repertoire, which includes:

Mary had a little lamb,
His fleece was white as snow.
Then there he Joey who belongs to
H. Lucas of Wandsworth. He knows
several poems, and he will tell one it is "O.K. Baby," and lots of other things. One of the smallest birds in the show drew the biggest crowd. It was the £1,000 ruby and topaz humming-bird that changed color as you looked at it.

KITCHEN CHORES BECOME A
PLEASURE WEARING THIS
ADORABLE APRON

You'll plan your kitchen chores with much enthusiasm with this pretty flowered percale apron in mind.

And it's the most simple thing to make it. Colorful bias binds finish all the edges. And by the way, these bias binds come folded, ready to stitch in place.

Yellow dimity with green dots and green binds is very effective to match your kitchen scheme.

Time checked, gingham, gay checks prints, Indian print cotton, checked or striped lawn, etc., are other sturdy suggestions for this attractive apron that you can make for a minimum cost.

Style No. 835 is designed in sizes small, medium and large. Medium size requires 3 yards of 39-inch material with 9½ yards of binding.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wisp coin carefully.

COMMENDED FOR BRAVERY

Port William fireman R. Cornthwaite of the Canadian Pacific Railway, whose heroic action in jumping from a moving yard engine at Port Arthur to save a woman from attempted suicide has received high commendation from Port Arthur's police magistrate and the district general superintendent of the Canadian Pacific.

New Idea On Liner

Kennel Attendant Takes Care Of Dogs During Trip

Ocean liners are getting very "doggy". The ship's butcher, traditional keeper of passengers' dogs, was relieved of his duties when the Washington sailed for Hamburg. A new rating, that of kennel attendant, was given to a member of the crew. The Washington's passengers no longer can question the identity of their steaks or profess to mourn the sad fate of Spot as they look on their chaps.

The number of passengers traveling to Europe accompanied by their dogs has increased to such an extent that new kennel accommodations had to be built and a special attendant became necessary.

The SNAPSHOT GUILD
"TABLE-TOP" PICTURES

Two table-top pictures. At left, is a tiny cork-and-paper slip given a "flying Dutchman" aspect by placing it on a pane of glass and shooting from underneath. Above, a circus scene made with familiar dolls and toys.

One of the most interesting of camera stunts is the making of "table-top" pictures. As the term indicates, you assemble your picture material on some convenient table or bench, and shoot it from any desired angle.

"Table-top" pictures are, usually, very much like model stage settings. You may use dolls, toys, statuettes, model airplanes, miniature trains, boats—anything at all that appeals to you. The point of the whole thing is to arrange your subjects in an interesting, realistic, or fantastic fashion, and to light this arrangement so that it makes a good picture.

Usually, these pictures are taken at close range. If your camera cannot be focused for close-ups, use a portrait attachment—a simple, inexpensive, and highly useful little gadget.

There's no limit to the effects you can achieve. And there's nothing much more fascinating than working them out. Here are some pointers that may save you time and trouble.

Remember that the only point of view that matters is the point of view of your camera's lens. Your set-up may appear charming from above or from the side. But don't let it mislead you. The camera must be placed.

Working at close range, the depth of focus your lens is not likely to be great. So keep the elements within as short a distance, front to back, as possible. And the most important feature should be at the point of exact focus.

Little Journeys in Science

ATMOSPHERE

(By Gordon H. Quest, M.A.)

Around the earth are eleven and a half trillion tons of pounds of air, or atmosphere, exerting a pressure of about fourteen tons on each person. Because this pressure is distributed evenly on all parts of the body, it does not cause inconvenience. At sea level, the air exerts a pressure of a little more than fourteen pounds per square inch, but the pressure is less on higher levels because the air above presses on that below, making the pressure greatest near the earth.

Torricelli, an Italian scientist, and pupil of Galileo, was the first to discover that air had weight. This is done by filling a bottle with air, weighing it, then removing the air by means of an air pump, and weighing again. The bottle will be found to be lighter when weighed the second time.

Air is necessary to both plant and animal life, and it is also vital to the process of burning. By volume air is composed of one-fifth oxygen and four-fifths nitrogen. In addition it contains 10 parts in 10,000 of carbon dioxide. There is also a variable amount of water vapor, small quantities of sulphuric acid gas and hydrogen, together with many minute particles of organic and inorganic matter. After an electrical storm, nitric acid is also found.

Humans and animals breathe in the oxygen from the air, and give out carbon dioxide. Plants in sunlight breathe in carbon dioxide, and give out oxygen. Man depends on oxygen for life, and so the importance of ventilation cannot be over-estimated.

In addition to life and combustion, other phenomena which depend on the air are: The propagation of sound, the disintegration of plant and animal matter, twilight, polar and terrestrial radiation and weather.

Scientists find that intense sound kills bacteria in milk, water, fruit juices and other liquids in a fraction of a second.

SUNDAY SCHOOL LESSON

DECEMBER, 9

THE CHRISTIAN AS TEACHER

Golden text: "Give diligence to present thyself approved unto God, a workman that needeth not to be ashamed, handling aright the word of truth." Timothy 2:15.

Lesson: Matthew 7:24-29; Acts 18:24-28.

Devotional Reading: 2 Timothy 3:14-17.

Explanations And Comments

Hebrews and Doers, Mt. 7:24-27. The parable of the Two Foundations ends the Sermon on the Mount, as given by Matthew.

"Many think that their lives are rock-found because they have a nebulous admiration for the moral teachings of Jesus" (Henry F. Cone).

The Master Teacher, Mt. 28:29.

The multitudes were astonished at Jesus' teaching, because he taught them as one having himself authority, with direct knowledge of the truth, and did not quote the authority of tradition, of what had been said before him by some one else, as did the scribes. The scribes were the professional students and teachers of the Law, and theirs was the task of multiplying copies of the Law, and of expounding it.

Learning to Teach Better, Acts 18:24-28. There came to Ephesus about twenty years after the death of Christ a man named Apollos, an Alexandrian Jew, who had a great command of language, could speak fluently and well, and was thoroughly versed in the Old Testament scriptures, in the knowledge of which like all Jews he had been brought up.

He had been instructed in the law of the Lord, knew something about Christ and the Christian life, and he began to teach boldly in the synagogue at Ephesus. His knowledge of Jesus had been gained from the disciples of John the Baptist, and was accurate as far as it went, but it did not go far enough, as Priscilla and Aquila perceived when they heard him.

It was with Priscilla and Aquila that he made his home while in Corinth (Acts 18:1-3), and when Paul was forced to leave Corinth, these two went with him (18:18). When they came to Ephesus, Priscilla and Aquila remained. There while Paul went on to Syria.

Priscilla and Aquila saw how useful Apollos could be in the work if he were better instructed, and they took him in hand and taught him more accurately the way of God. He had come to Ephesus seeking opportunity for doing good, and he not only found the opportunity but unexpectedly received great joy himself.

Soon he wished to go over into Achaia to teach, and in this he was encouraged by the brethren who wrote to the disciples there to receive him. There Apollos helped much through grace that they had believed, as the marginal rendering of the Bible translates. He was able to confute the Jews of Corinth and show by the Scriptures that Jesus is the Christ. Paul speaks of Apollos as watering where he had planted (1 Cor. 3:6), and among the people he became so attached to Apollos and his teaching that they called themselves his, rather than Paul's, disciples (1 Cor. 3:4).

May Not Throw Flowers

Unwritten Rule Governs This Custom At Royal Weddings

Princess Marina's wedding brought profit to many people, comments the Glasgow Herald. The system which worked so well for onlookers during the wedding of the Duke and Duchess of York was reported, and the route followed by the three processions in connection with the ceremony were carefully studied. Nearly everyone who possesses a window that might give a royal view made full use of it and the commercially minded scaled appropriate charges to visitors who followed by the three processions in connection with the ceremony were carefully studied.

URGES GERMANY TO ABANDON ISOLATION POLICY

London.—Sir John Simon, foreign secretary, wound up a "council of state" debate on home defences in the House of Commons by announcing the full contents of Stanley Baldwin's speech, urging Germany to abandon her policy of secrecy and isolation, had been delivered to Germany, France, Italy and the United States with a full explanation by the foreign office.

Sir John's announcement climaxed an all-day debate on Imperial defence. The house rejected an amendment to the address in reply to the throne speech from Winston Churchill, declaring Britain's defences were entirely inadequate, and approved the government's address.

The foreign secretary emphasized there was no difference of opinion in Britain on the question of defence. There were no advocates of unilateral disarmament.

He said Mr. Baldwin's plea that Germany ease the condition of nervous apprehension in Europe by tearing away the veil of secrecy helped clear away a great deal of suspicion. That speech had been delivered to world powers, he said, "because it is not an Anglo-German proposition but an European and world proposition."

"We have thus helped to clear away a great deal of suspicion. The communications to other governments constituted a new development and might create a new situation if we can get international agreement."

"We should like an agreement on disarmament at the lowest possible level. If we cannot get an attainable ideal we must seek an agreement at the lowest level possible. We stand for regulated limitation as opposed to competition and unregulated armament."

Germany's factories are working under "practically war-time conditions," Mr. Churchill asserted. He declared the great new fact which riveted the attention of every country in Europe and in the world, is that "Germany is re-arming on land, to some extent at sea and, which concerns Britain most, in the air."

Stressing the need of strengthening the air force particularly, Mr. Churchill said almost every part of the United Kingdom was within range of air attacks from the continent.

"It is useless to move arsenals and factories to the west coast," he said. "We must face the peril where we stand."

Pending some radical new discovery, he declared, the only practical measure of defence was the ability to inflict as much damage to the enemy as he could inflict on Britain.

He advocated the maintenance regardless of cost, for the next 10 years of an air force substantially stronger than that of Germany.

"The Germans are mostly friendly," he added. "There is no reason to think they will attack us. But under the Nazi regime the decision of only a handful of men is required to launch an attack without notice."

Stanley Baldwin, lord president of the council, said that even while things looked "no black" he had not abandoned hope of arms restriction.

"There has grown a condition of nervous apprehension which bodes ill for peace," Mr. Baldwin admitted. He suggested the Germans seek themselves whether the price Germany was paying in the mental condition of Europe was worth her secrecy and her breaking the Geneva link with her sister nations."

Willing To Help

Montreal.—Improvement in the pensioners' situation for war veterans enabled the Canadian Legion to consider questions with which it could not deal previously, Colonel W. W. Foster, Vancouver, acting president of the Legion, stated here. As result of this improvement, he said, the Legion has now offered the services of its members to the Dominion government to help, if possible in relieving the unemployment crisis.

W. N. U. 2075

Big Business Rules

Manipulators Exert Influence To Support Government Control, Says Stevens

Toronto.—"The manipulators of big business are the real government of Canada," declared Hon. H. H. Stevens before University of Toronto students at Hart House.

The former minister of trade and commerce was guest speaker at the university debate on the resolution "That in the opinion of this house big business is a curse when directed solely by the profit motive."

"Now don't get me wrong," he continued. "I do not say, nor would I admit, that the leaders of big business personally interfere with the operation of the government, but the very nature of the laws of the country and the character of this big business, as defined in the resolution, exerts an economic influence which supplants government control."

Mr. Stevens was the last speaker for the affirmative and at the conclusion of his address the house voted 307 to 38 in favor of the resolution.

Mr. Stevens said he turned to the financial page of his newspaper and read there the statement of a large and powerful bank. The statement showed deposits by the people of \$630,000,000, government and other bonds and debentures, \$317,000,000, and commercial loans, \$243,000,000.

"Now far be it from me to criticize any bank whose power and strength is denoted by such figures," said Mr. Stevens, "but it is my contention that banks are not meant to be a safety deposit place for government bonds. They are the custodians of the monies of the people to be loaned out for development of industry and business. Loans to business men of Canada are about one-half of what they should be."

"And here is a fact of which I am ashamed, and I am sure you will be too. In the Montreal, Toronto and Windsor districts there are 100,000 workers living under conditions that would be a disgrace to mid-continent areas, leave alone Canada."

The great crime of the age, said Mr. Stevens, was the refusal of big business men to accept responsibility for those working under them. "I may be accused of being sentimental," he said, "but we can afford some sentimentality, for there is done little of it in big business."

Referring to the tremendous executive salaries paid by one firm, he said if the firm had paid one-third of the salaries to their executives which would have been quite sufficient to get along on, it would have meant a saving of \$1,000,000 a year, "and would have given every one of their 5,000 employees living below a decent standard an additional \$200 a year. But those executives were paid for their capacity to go out and buy better clothes, houses, or to get more out of their workers for less."

Money Not Available

Government Cannot Authorize Outlay For Radio Station

Ottawa.—Owing to lack of funds, the government has turned down the recommendation of the radio commission that a high power broadcasting unit be constructed in central Saskatchewan to serve the middle section of the prairie provinces.

The proposed station would have cost about \$250,000 and there is no money available to meet it. For this reason the government has declined to authorize the outlay this year and will reconsider the position next spring when the new fiscal year begins.

Bread Cards Abolished

Moscow.—Bread cards will be abolished in Soviet Russia on January 1 and bread flour will be sold generally in open shops, it was announced at a meeting of the central committee of the Communist party. The committee announced this will necessarily increase bread prices, but gave instructions that wages, workers' pensions and money given to students will be increased to meet the advance.

Poultry For England

Halifax.—Part of John Bull's Christmas dinner at least is assured by shipment from this port during the first week of December of 1,000,000 pounds of choice poultry valued at \$200,000.

NO COMPROMISE

While conceding Great Britain the right to possess the largest navy in the world because of her far-flung Dominions and Colonies, Tanoo Marudaira, above, declared Japan would not be satisfied with anything less than full naval equality with the United States.

U.S. Team Wins

Decisive Victory Obtained In Jumping Event At Winter Fair

Toronto.—Consistent riding by United States army men gave them a decisive victory in the international officers' team challenge trophy, outstanding event at the Royal Winter Fair horse show. The trophy, presented by Hon. G. Howard Ferguson, Canadian high commissioner at London, is open to all nations for teams of three jumpers.

The Irish Free State army team, last year's winner, put up a strenuous defence but 10 faults made by the first rider lost their chance of victory.

The United States, which won it in 1932, had only nine faults scored against it, three by each rider.

The Chilean outfit with 15 faults were shunted into third place. Twenty-one faults sent the French squad into fourth place ahead of the Canadian team which scored 29 faults.

Bank Of Canada

Montreal Stockholders Suggest Nominees For Board

Montreal.—Montreal stockholders of the Bank of Canada suggested nominees to the board of the Bank of Canada as follows: Sir Newton Moore, president of the Dominion Steel and Coal Corporation; Victor M. Drury, president of the E. B. Eddy Company, Limited; Robert J. Magor, president of the Montreal Board of Trade and president of the National Steel Car Corporation; W. C. Finley, director of the Montreal Tramways Company, and Lt.-Col. F. R. Phelan, president Financial Service, Limited.

The local group of stockholders who agreed on the nominations met at the board of trade at the suggestion of the Canadian Chamber of Commerce.

NEW DOMINION CABINET MINISTERS

Richard B. Hanson, K.C., M.P. (left), whose appointment as Minister of Trade and Commerce in succession to Hon. H. H. Stevens is understood to have been decided upon at Ottawa, Grotr Stirling (right), M.P. for Yala B.C., is reported to be the choice for Canada's new Minister of National Defence, succeeding Hon. Donald Sutherland, who will, it is said, assume the portfolio of Pensions and National Health, laid down by Hon. Murray McLaren. The latter is understood to be withdrawing from the cabinet. Mr. Stirling will, it is said, also be Acting Minister of Fisheries.

Canada's New Bank Bills

Details Were Made Public By Finance Minister

Ottawa.—Members of the royal family and two famous Canadian prime ministers are portrayed on the new paper currency to be issued by the Bank of Canada. Details of the new money were made public through Finance Minister E. N. Rhodes. The denominations so far contracted for are 1's, 2's, 5's, 10's, 20's, 50's, 100's, 500's and 1000's.

Sir John A. Macdonald, Confederation prime minister, and Sir Wilfrid Laurier, the great Liberal, who was prime minister from 1896 to 1911, are the two Canadians whose likenesses will be perpetuated in the new money. Sir John A. Macdonald's likeness will be engraved on the \$500 bills and that of Sir Wilfrid on the \$1,000 notes, the reverse side bearing allegorical engravings representative of agriculture and "protection" respectively.

The new bills will be six inches long by 2 1/2 inches wide, fractionally shorter and wider than the United States bills and much smaller than the existing Canadian notes.

The 1's will be green, 2's blue, 5's orange and 10's purple. Colors for the other denominations have not been definitely decided.

Wheat Quota For France

This Means That Argentina And Canada Must Take Less

Budapest.—Representatives of six wheat exporting countries meeting here decided to grant France an export quota for 1934-35, provided their respective governments approve.

The decision came after three hours of discussion, following the adjournment of the full wheat conference.

Draft of the agreement, which United States delegates described as "very complicated," was sent to the seven governments, including France, for approval. Meanwhile delegates refused to reveal the size of the quota offered France.

This was the first time an export quota had been offered France and it meant that other exporters, particularly Argentina and Canada which between them expected to get two-thirds of the total quota of 600,000 bushels, must take less.

It was believed the net figure proposed for France was between 15,000,000 and 20,000,000 bushels.

Japan's Wheat Crop Up

Tokyo.—Japan's 1934 wheat crop shows a substantial increase compared with 1933 according to an estimate of cereal crops issued by the ministry of agriculture and forestry. The wheat yield this year is estimated by the ministry at 9,451,000 koku (47,250,000 bushels), an increase of 27,390,000 bushels over the preceding year's harvest.

Excluded For December

Paris.—Canadian salmon exporters will be excluded from the French market completely during December. The 1933 accord expires Dec. 1, and the new accord, reached last September, does not become effective until Jan. 1.

CHOICE OF WEST FOR DIRECTOR OF CENTRAL BANK

Saskatoon.—R. A. Wright, prominent farmer and cattle breeder of Drinkwater, Saskatchewan, received the unanimous support of western boards of trade as their nominee as director of the Bank of Canada representing the three prairie provinces. His name was forwarded to the Canadian Chamber of Commerce, and will be included, it is expected, in the list of officers for which the chamber will solicit the support of the shareholders.

Several other persons were under consideration at the meeting, but were unsupported on the grounds that their chief occupation was not that of primary production as set out in the act and recommended to the western boards by the chamber of commerce. Mr. Wright is actively engaged in farming and livestock raising.

Representatives at the meeting here were: W. McCurdy, president of the Winnipeg Board of Trade and business manager of the Winnipeg Tribune, and E. C. Gilliat, secretary; J. H. Hanna, commissioner of the Calgary Board of Trade; L. A. Thornton, representing Regina Board of Trade, and A. J. Trotter and J. D. Gunn representing Saskatoon. J. W. Glenwright, of Edmonton, was unable to be present, but the Edmonton Board of Trade telephoned concurrence in the selection of Mr. Wright.

Mr. Wright's name was placed before the meeting by the representative from Regina. In supporting his selection, it was pointed out that he was vice-president of the Canadian Chamber of Commerce for Saskatchewan, and a director of the Saskatchewan livestock board. He has had a long experience in prairie farming and now operates a large farm in the southern part of the province. Mr. Wright is president of the Western Canada Livestock Union. Several years ago he took a prominent part in organizing opposition to a suggested compulsory livestock pool.

Action to agree upon a single nominee was begun by the Canadian Chamber of Commerce about 10 days ago and was taken to make certain that the prairie provinces would get representation on the board of directors. Extensive stock holdings in central Canada suggested the possibility that no westerner would be selected by the shareholders.

Left To Sub-Committee

Livestock Marketing Plan To Be Discussed With Prairie Provinces

Winnipeg.—Efforts to formulate a livestock marketing plan for the three prairie provinces was shunted onto the shoulders of a sub-committee instructed to negotiate with Alberta and Saskatchewan breeders.

Winding up a two-day discussion, representatives of Manitoba farm organizations named a sub-committee of five to seek discussions with Saskatchewan and Alberta organizations as early as possible.

Seek Wheat Agreement

Budapest.—The international wheat advisory committee has closed its formal meetings here but delegates of the big four exporters—Canada, Australia, the Argentine and the United States remained over in an endeavor to settle among themselves the differences over new export quotas.

Win In Debate

Edmonton.—University of Alberta debaters here defeated the touring British team of Leslie Jackson and Robertson Critchton by upholding successfully the resolution that "Liberalism, though it yet speaketh, is dead." The Alberta victors were Ralph Collins and William Epstein.

Money For Aviators

Johannesburg, Union of South Africa.—Charles W. Root and T. Campbell Black, London - to Melbourne air derby winners, will make \$15,000 (about \$75,000) on advertising fees and film rights. A. O. Edwards, who financed the flight, announced here.

Do Your Christmas Shopping Early

Fish Specials at the Sanitary Meat Market.

Muskalys, Rollmops, Lutefisk, Spiced Herring, Bismark style, Gaffelbiter, Boneless Gaffelbiter, Anchovies, Breakfast Mackerel, Ryola, Norway 3K Herring, Flatbread, Fishballs, Boneless Smoked Herring, Gammelost, Shrimps, Cove Oysters, Arna, Flatbrod.

Apples, Crabapples, Plums and Pears.

In Good Condition. Reasonably Priced. At the L. Zilliox Warehouse, First Street, Stony Plain.

THE WHEAT SURPLUS

The world's "carry-over" of wheat since 1928 has been about 1,100 million bushels each year instead of a normal of 625 million. Authorities estimate that by August 1st next the "carry-over" will be reduced to a figure between 725 and 825 million, or still show over 100 million bushels more than normal. A great shortage of coarse grains, however, is apparent throughout the world. Some expect that a substantial part of the world's wheat "carry-over" will be used to replace coarse grains. If this should occur, no doubt, wheat prices will tend to rise—otherwise they may not do so due to low purchasing power of European bread-eating people.

SEARLE GRAIN COMPANY, LIMITED

TOWN OF STONY PLAIN.

Notice is hereby given that, under the provisions of The Tax Recovery Act, 1929, the Town of Stony Plain will offer for sale by public auction, in the Town Hall, Stony Plain, on Saturday, the 8th day of December, 1934, at 2 o'clock in the afternoon, the following lands situated within the town, viz:

Lots	Block	Plan	Lots	Block	Plan
10 to 25 (incl.)	3	4180R	19, 20, 21 and 22	6	4180R
1 & 2 and 4 to 17 (incl.)	4	8	8	11	5
1, 2, 3, 4, 6, 7, 11, 12	5	11 and 12	11 and 12	4	5900U

Each parcel will be offered for sale subject to a reserve bid, and subject to the reservations contained in the existing certificates of title. Terms, cash, unless otherwise arranged.

Dated at Stony Plain, this 6th day of October, 1934.

JAS MALLOCH,

Secretary Treasurer.

THE NEWS OF STONY PLAIN AND DISTRICT.

The new paying teller at the local branch of the Canadian Bank of Commerce is Mr. A. C. Stewart, from the branch at Bawlf, Alta. Mr. G. Robertson has been transferred to the branch at South Edmonton.

Mr. Hayes, until recently the druggist at Nordegg, has recently paid Stony several visits. We understand that Mr. Hayes has intimated his intention of operating a drug shop in Stony.

Members of the W. I. are looking forward with interest to their next meeting, when a demonstration in icing the Christmas cake will be given.

A hockey game is billed for Sunday afternoon at the local rink, when a City team plays the Juveniles.

BUTTER AND EGGS WANTED at The Royal Cafe.

This Week's Talkie.

This week's picture to be shown at Kelly's Hall is to be a real thriller. "The Solitaire Man" is the caption, and is said to be a first-class presentation of the doings in the old-time underworld. It will be seen Herbert Marshall, Mary Boland, Lionel Atwell, Mary Robson, Elizabeth Allen.

The double feature shown on Thursday here was fully up to the standard. The first-shown film "The Hot Spot" showed the inside of the Sing Sing prison and the electric chair. Tom Keane, in "The Sagebrush Trail" gave a good representation of the Western film, with its innumerable thrills and inevitable scenes.

C. N. Train Service.

The train No. 190 leaves Jasper for Edmonton at 10 a.m. Sundays, Wed., Friday; arrive Stony Plain 8:09 p.m.

Train No. 189 leaves Edmonton 9:30 p.m. Sun., Tues., Thurs., and arrive Stony Plain 10:37 p.m.

Grain Sample Rule Changed.

The Board of Grain Commissioners for Canada have issued a notice that for the protection of all concerned on and after Dec. 1 no samples that do not contain at least 2 pounds of grain as called for in the Regulations will be graded by the floors on the Board's Inspection Branch.

Where Every One Is Happy!

The Curler club here this season has made a good start with about 9 or 10 rinks to face the starter. There promises to be nice sociable games during the season. A movement to join with the Blue Ski Club was frowned down on by the officials. This is going to be a lively season for the members, as the Amusement Committee has arranged for a series of widge parties, conversations, lawn socials, afternoon teas and cup reunions, and mebbe a dance. —Nevis News.

Open Seasons for Game.

HER ARMS AND LEGS IMMOVABLE

Ten Years With Rheumatism

To this woman it must have been like commencing to live a new life, when she began to use her arms and legs again, after they had been helpless for ten years.

"I suffered with rheumatism," she writes, "and had been bedridden since 1920. I could not move arms or legs, and had to be fed like a child. Everybody thought I should be an invalid all my life. I forced myself to fight against it, and tried a number of different things. It was Kruschen that eventually saved me, and to-day I consider it is saving my life. My condition has greatly improved, and my limbs are gradually becoming more supple. Already I can eat without assistance, and dress myself—which I had not done for ten years."

M. H. Two of the ingredients of Kruschen Salts are the most effective solvents of uric acid known to medical science. They swiftly dull the sharp edges of the painful crystals, then convert them into a harmless solution. Other ingredients of these salts have a stimulating effect upon the kidneys, and assist them to expel the dissolved uric acid needles through the natural channel.

THE TENDERFOOT

By

GEORGE R. RODNEY

Author of "The Coronado Trail," "The Canyon Trail," Etc.

SYNOPSIS

"You've fallen heir to the half-share in plenty of trouble," said the lawyer, Gerald Keene. "The Broken Spur has been systematically looting the ranch, and old Joe Carr, your partner, is drinking himself into ruin."

But Keene decided to go see what was happening for himself—so he, Gerald Keene, and his wife, Edith, left for the Hour-Glass Ranch, but as Duro Stone, tenderfoot in a Montgomery Ward wide-brimmed outfit.

Dad Kane, desert rat and lunkhead prospector till now is returning to tell Dustin and Spike Goddard, owners of the Broken Spur ranch, who had grubstaked him, of his discovery of a rich gold mine, and shows samples of the ore. He sends Broken Spur man-rustling Hour-glass cattle and protests against it.

Spike Goddard and Sam Dustin, fearing the old prospector may tell others the things he has seen as to the branding of Carr's cattle, plot to get him to show them the location of the mine and then to kill him.

Gerald Keene, dressed in ridiculous cowboy costume, arrived at the Hour-glass ranch and is hired as a cowboy by Joe Carr. The impersonation of a tenderfoot is successful, and he is accepted as such by the other occupants of the bunkhouse.

Proof of Dustin's cattle stealing activities was discovered by Stone, who accompanied by Carr was riding fence a long way from the Hour-glass ranch house.

(Now Go On With The Story)

CHAPTER V.—Continued

At the sound of hoof-beats on the trail, man and girl looked up.

"Hello," he said. "Here comes some one."

She gave a quick glance at the oncoming horse, a towering black, and turned a pretty shoulder.

"It's no one I want to see," she said coolly. It's the man who was thinking about in connection with that stolen cow. It's Mr. Dustin of the Broken Spur."

The black shouldered through the tangle by the pool and rushed the water, and the other caught sight of the two above him. The next moment he jerked his horse back on his haunches, knelt him out of the pool and forced him through the brush to Edith's side.

"I'm glad to see you, Edith," he grinned at her. "You're out early, aren't you?" His quiz-

SKIN BLEMISHES

Vanish Before Physician's Prescription

Those spots or pimples on your face why let them go on tormenting you? Take millions of others have done, you can get rid of your skin trouble through the work of a great physician—Dr. D. D. Dennis. Dr. Dennis' prescription—known in many countries as D.D.D. and now manufactured by Canada's Italian Skin Chemists—will bring you relief at once, and quickly restore your skin to health. All druggists sell D.D.D. Trial size free. Guaranteed to give instant relief or money refunded.

W. N. U. 2078.

zical glance took in Stone, sitting awkwardly in his saddle, looking straight ahead of him into space. "I gun-muzzle dropped into line with his hip. Even a 'store gun' can hit at seven feet.

"If you try that," said Stone grimly, "I'll sure plug you dead center; see your father's hauled ropes and wire down here to fence Soda Springs. Sorry, but I can't allow that till the courts have decided."

"Till they have decided, the Springs are ours," she said hotly. "I fear I've seen too much." She nodded at the dun cow and the calf. "It just happens that I can swear to that cow in any court of law."

"Yes? Well? Courts are pretty expensive amusements for the Hour-glass. It'll only need a little sense to straighten this mess out. It needs a judge and twelve jurors to take the Soda Springs away from your father. A justice of the peace or a priest can give them back. . . . In five minutes, if you say the word."

For fully a minute she did not understand what he meant. Then her face went white under its tan and her head hung high. Her red lips had paled and her eyes seemed to emit little sparks as she turned to Stone.

"Did you hear that, Mr. Stone?" she called. There was a fighting edge to her voice that thrilled Duro to his inmost fiber. "Mr. Dustin, if I have not misunderstood him, has offered to withdraw his suit to take from us what we own. . . . These Springs. He will do this if I go before a justice of the peace or a priest and become one of his women. A legal one. I understand. I feel I need some advice. You are interested. What shall I tell him?"

Dustin, appalled, uttered a hot oath. He had thought she would at least take the matter under consideration. He regarded Stone no more than one of the ponies but he felt ashamed. Edith's words, her manner, her whole demeanor cut him like knives.

Stone's face was impassive. No one would ever have guessed that under that exterior his blood was leaping like molten lava. God, how this girl could fight. What a wife she would some day make!

"You see," she said, "he would only offer that to get what he can never get but by purchase. . . . A wife. No sane person would tie their life to him except for gain. He has one establishment in Sepulchra. He . . ."

"Oh, here!" Stone raised a hand. "It's not my business, Miss Edith."

"By God! You and she have made a mess of it," shouted Dustin. The last vestige of self-control gave way and the dam burst. "Marry you? Yes, I did offer it. I'm a fool. I don't have to marry you, you red-headed firebrand. You'll be glad enough some day to have any man give you his name that forget that when you put your foot of a father in the County Poorhouse. . . . You didn't like to have me tie my horse to the Hour-glass tie-rack but you can trapeze over the hills with any bit of human tumbleweed that turns up dressed from a catalogue. No wonder people talk about you."

He got no further. Stone flung out of saddle and in one movement his iron grip closed on Dustin's off-foot. The Household Cavalry in London streets know that grip. Cleverly used, it can dismount any horseman who ever sat in saddle, provided only that he is unprepared.

Dustin was totally unprepared. There is but one guard for that clutch. The rider must let his gripped leg go loose. He must let it swing up and over the horse's back. He must pivot on his other foot. There is no real guard. There is a counter-attack. . . . The rider swings back into saddle and his free foot drives down like a pile-driver on the defenceless head of his attacker. But Dustin did not know this. He struggled and his own weight added to his catastrophe. Stone heaved at his ankle, raised it chin-high, and the next moment Dustin, with a queer yell that almost strangled him, was rolling in the deepest part of the pool with his horse atop, while Stone, his eyes alight, watched him from the bank.

"Sorry I had to do it," he said. "You just asked for it when you spoke to Miss Edith like that. . . . No, you don't!"

Dustin's hand stopped midway to his holster as Stone's nickel-plated Hands up."

Dustin's hands went high in air and the dripping pony struggled to the bank, where Edith sat holding her head in both hands. It had all happened so quickly that she had not comprehended.

"Come on out of your sea-foam, you . . . you bloomin' Venus," said Stone. "You ain't much to look at right now."

As Dustin struggled up the slippery bank, Stone matched and flung it back into the pool. Then he struck the black on the haunch with his hat and sent him at a gallop into the scrub.

"You can walk home and cool your caliente cabeza (hot head)," he said. "Come on, Miss Edith. Let's head for home."

She drove her spurs in to the rowels and sent her astonished pony at a gallop through the scrub and waited for him at the entrance to the open trail.

"You've made a deadly enemy," she said breathlessly. "You must never forget that man. He is more deadly than a rattlesnake. . . ."

"Oh, sure." He was obviously impatient and it angered her. "Mind what I'm sayin'," she snapped. "That man will kill you if he gets a chance."

"He won't have a chance," he said casually. "I was just wonderin' . . ."

Again she drove in her spurs and took the gallop and the two swept in a glorious rush to the home corral of the Hour-glass.

Once inside the ranch-house, Edith must have told a rather complete story, for Crews tackled Stone when they were alone by the water-trough in the corral that evening.

"Son," said Crews, "you're sure as green as hell, but the Hour-glass owes you a debt for what you did this afternoon to that damned cow, Dustin. Edith told her father and me. . . ."

"Did she say anything about that cow and calf that started the mess?" "Sure she did. How did they start it?"

"That man Dustin had just done brandin' 'em," said the amateur puncher. "When his horse came out of the water I noticed that the cinch ring was all newly blackened by fire. He'd been usin' that to change the brands."

"That's that queer. You . . . a amateur at that. . . . All right. . . . But you take it from me. . . . Look out for Sam Dustin. He'll get you if he kin."

"Sure," said Duro Stone. "That's fair. If he can. Let it go at that."

CHAPTER VI.

Frank Crews, coming out of his room, stood looking over the wide range behind the ranch-house of the Hour-glass. He was disturbed over what Stone had told him the night before and he had thought much about this new employee. Stone was apparently honest. He was a glutton for work and there was something likable about him. But Crews was suspicious at heart in all matters affecting the Hour-glass. He sighted Lee heading for the kitchen and hailed him.

"Send that new man Stone to me," he said.

The bunk-house took the word and presently Duro shot out of the open door like a pra from its pod. Crews grinned amiably at him.

"Look a-here, Stone," he said. "I've forgot all that you told me last night. I ain't too durned good to remember much sometimes. I'm goin' to forget it till we can find some proof. Mind you, I don't expect you to find any proof but I just dasent start a civil war on the range unless and until I got my gun loaded. Old man Carr is too old to pick a row with this man Dustin even over Edith. You see that? We're tryin' to locate this man Keene, who owns the other half of the Hour-glass. Till we find him, we can't do much but watch and wait. I tellin' you this so you'll see right where we stand. If you feel like keepin' on here at the Hour-glass, we want you. We want all men who'll be loyal to their salt. That's about all, I reckon."

He strode away to his breakfast and Duro wandered back to the bunk-house.

"Loyal to his salt." . . . That was the word. He reflected that he had come here to the Hour-glass to find out what was wrong and he was finding out with a vengeance. It was

follow this plan for better CONTROL OF COLDS

For FEWER Colds

VICKS VA-TRO-NOL

At the first warning sneeze, sniffle, or nasal irritation, quick! . . . apply Vicks Va-tro-nol—just a few drops up each nostril. When used in time, Va-tro-nol helps to prevent many colds, and to throw off colds in their early stages.

For SHORTER Colds

VICKS VAPORUB

If a cold has already developed, apply Vicks Vaporub over throat and chest at bedtime. Mothers of two generations have learned to depend on its poultice-vapor action to help shorten a cold—and without the risks of "dozing."

Build RESISTANCE to Colds—by following the simple health rules that are also a part of Vicks Plan for Better Control of Colds. It has been clinically tested by physicians—and proved in everyday home use by millions.

(Full details of this unique Plan in each Vicks Package)

VICKS PLAN FOR BETTER CONTROL OF COLDS

Dustin. . . . All Dustin! But so far he could show no proof. There was no ground yet for any action. He must wait.

In the meantime there was . . . Edith.

That experience over by Soda Springs had given her a confidence in the new employee that she was sure was not misplaced. She accepted him, since that day, at his face value and sometimes she flushed at the thought that she awoke to the fact that she seemed to have always known him. She liked him, too. True, he was densely ignorant of all the ranch life that she knew; true, at twenty-five he had no settled business; he had admitted that to her, but . . . Oh, well! She stopped her analysis at his point and went for her pony.

The bunk-house accepted Stone frankly . . . yet wondered at him. Technically he was an ignorant of ranch life as any tenderfoot. Yet he could ride . . . after a fashion (they never suspected the trouble it was to appear awkward) and they grinned a little at Edith's frankly professed friendship.

"You'll be wantin' a permanent mount," said Crews. "Better take that big Isabella horse in the far cor-

ral. If you take time to gentle him, he'll make you a good mount."

Stone knew and had coveted that horse, a half-bred, bigger than most and made of steel and whalebone. Crews watched his new hand catch his new horse and laughed a little at his awkwardness.

It took him days to master that horse, for months of idleness had filled him with an equine devil and he knew no master. When Duro Stone shot out of saddle to land twenty feet away on feet and hands, the bunk-house laughed. . . . All but Red Thom, who screwed an inquiring eye at the limp figure that rolled away like a shot rabbit as the horse fell.

(To Be Continued)

According To Sight

According to experiments conducted by Prof. Francis B. Sumner, color-changing fish depend on their sight to change their colors. When the upper portion of the fish eye was shaded, they assumed a darker shade, while they turned lighter when the lower part of the eye was darkened.

If a car stalls on a moonlight night and the man starts looking in the girl's eyes he's single—if he looks in the gas tank—he's married.

"...So that Our Visitors will be Sorry to Leave"

"If we are going to invite people to this country, we must be honest with them... Courtesy costs nothing and is one of our greatest tourist assets... Let us so treat strangers within our gates that it will be easy for them to come, pleasant for them to stay, and difficult for them to leave."

Rev. Hon. R. B. BENNETT, Prime Minister of Canada, to the Canadian Association of Tourist and Publicity Bureaus, November 6, 1934.

Canada's tourist activities represent more than a great industry from which everybody benefits. They provide an opportunity to create what the Prime Minister has described as "that feeling of neighbourliness" which is such a vital factor in building up cordial relations within the family of nations.

For both these reasons, may I urge upon the people of Canada the importance of showing consideration, courtesy and honesty to guests of our country? Let us all do those little acts of kindness which count for so much when one travels in a strange land.

We have a beautiful country. We must keep it so. We want our visitors to travel highways free from disfigurement, walk the streets of cities that are orderly and clean, and find at the end of every day's travel an inviting spot to rest. Canadians should turn their attention now to the important work of preparing for next year's tourist season.

As a nation, we are advertising abroad the attractions of Canada as a holiday land. We must see to it that our guests return home with only the happiest recollections—and the determination to come back again and again.

Nor should we forget, in planning our own vacations, that there are beauties to discover and friendships to be made in our neighbouring provinces. We live in one of the world's most glorious playgrounds—let us learn to know better the rich variety of its travel attractions.

R. J. Manion
MINISTER OF RAILWAYS AND CANALS

Ottawa, Canada

A PIONEER OF SPRUCE GROVE DISTRICT DIES.

Ludwig Schoepp, an old-time resident of the Spruce Grove district, passed away at his residence on Sunday, Dec. 2, at the age of 77 years. He is survived by his wife, five daughters—Mrs F J Ulmer of Spruce Grove; Mrs C Goetz of Spruce Plain; and Mrs G W Giese, Mrs A M McGavin and Mrs Geo M Cormie, all of Edmonton, and 2 sons—John and Adolf of Spruce Grove district.

The funeral services were held on Wednesday, the 5th; a private service being held at the family residence; and a public service at 2.30 at St Matthew's Lutheran church, Spruce Grove. Rev G Poetzsch officiated at both services.

Interment was made in the family plot in St Matthew's cemetery. I

Here and There

A further concession to the travelling public is announced by C. F. Riddell, Chairman, Canadian Passenger Association, in the statement that in future one-month round trip railway tickets previously good for continuous passage only between departure point and destination, will be valid for stop-over at intermediate points going and returning. For many years Canadian railways have been selling one-month round trip tickets at twice the one-way fare, less an 11 per cent good for continuous passage only. Now, the stop-over privilege is granted without any increase in fare and passengers deciding en route to stop over, may do so on application to the conductor. This concession, it is felt by railway officials, will do much to further promote travel by rail in Canada.

W. E. Allison, manager of mail and baggage traffic, Canadian Pacific Railway, has been elected vice-president of the American Association of General Discharge Agents, comprising representatives of all the railways in this continent.

H. C. Groat, general superintendent, Ontario district, of the Canadian Pacific Railway, has been promoted to the post of assistant to the vice-president with headquarters in Montreal. Mr. Groat is a well-known and popular official of this railway in Ontario, where he has been stationed for a number of years.

Figures issued by the Dominion Bureau of Statistics dealing with operations in August of all steam railways in Canada having annual gross revenue of at least \$500,000, reveal that higher gross earnings were offset by increased expenses, including an escalation of over \$500,000 in payrolls.

Mrs. A. A. Adams, of Oak Bay Mills, Que., has been awarded first prize in the most beautiful Maple Leaf contest conducted this year by the Canadian Pacific and Canadian National Railways. More than 10,000 specimens were submitted. The largest leaf phase of the contest was won by Richard Chambers of Vancouver, who submitted a specimen with an area of 236 1/2 inches.

Five hundred school-age boys and girls of Montreal recently took advantage of the unique all-expense trip operated by the Canadian Pacific Railway from that city to Ottawa and were addressed in the Parliament Buildings by St. Hon. R. B. Bennett, Prime Minister of Canada. Sight-seeing auto-bus trips across Ottawa included inspection of the Houses of Parliament, the Memorial Tower and Hall of Fame, and a special recital of the 51 bells of the famous Carillon Tower.

Bob Murray, Quebec's No. 1 tennis player, and Laird Watt, second ranking provincial player, were singled out for praise by "Big Ben" Tilden, who sailed recently by the Empress of Britain for England. "They are championship players in the making," said the one-time world's champion.

Five cruises in one may be made this winter on the Empress of Australia sailing from New York January 18. They are: the Mediterranean Cruise, the East African, South African, South American and West Indian. There is a full week in 1935 numerous stops on the east coast of Africa, 12 full days ashore in the Union of South Africa, four stops in South America and return via Trinidad, Jamaica and Cuba.

Leading a baseball tour of the Orient and interviewed aboard the Empress of Japan en route to Tokyo, Connie Mack, manager of the Philadelphia Athletics, said it was his ambition to continue as manager until "I have passed my eightieth birthday." He is now in his 71st year.

Announcements.

The Rally Day service of the United Church Sunday school will be held Sunday, Dec. 9, at 7.30 p.m. Instead of the usual readings, a pageant entitled "Sunday School Visitors from Far Places" will be given. All are welcome.

Mr Jos. Best, secretary of Inga Municipality, will again be in Stony Plain on Friday, Dec. 14, to collect taxes. The tax penalty goes on the following day, the 15th.

Miss Carrie Metzler has opened a Dressmaker's Shop, Plain Sewing, Pressing and Cleaning, in the Forster building, Main St. Reasonable charges.

SERVICE GARAGE. Stony Plain.

"The Amazon" Monday Next

Monday next, Dec. 10, Stony is to be favored with another visit by the noted entertainers, The Beaveridge Players. Their attraction, this time, will be "The Amazon"; a show said to be chuckful of laughs, songs, comedy and drama. Those who have seen this troupe in action, particularly on the last trip here a short time ago, will no doubt be anxious to see them again in their new presentation. A dance follows.

Steady Progress.

During the last year or more no publication has shown more remarkable strides in the matter of increased circulation than has The Family Herald and Weekly Star. This is not strange, for it is evident that in time of stress people are prone to cut down on the number and variety of magazines and papers coming into their homes, and they find in The Family Herald and Weekly Star a paper which, at \$1 per year, gives them every variety of reading, for old and young, all combined in this one publication. Every issue overflows with practical farming ideas, up-to-the-minute articles, short stories, together with a weekly newspaper section which rounds out a feast of reading without compare. Truly it has been well said that The Family Herald and Weekly Star is the best for the least.
